### REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The Examiner deems Clark et al. (WO 01/88703 A1) hereinafter Clark, Kothari et al. (US 2004/0205707 A1) hereinafter Kothari, alSafadi et al. (US 2004/0003341 A1) hereinafter alSafadi, Iremonger et al. (US 7,000,182 B1) hereinafter Iremonger to be relevant prior arts, wherein Clark being the closest prior arts. Independent claims 1, 14, 15 and 18, when considered as a whole, are allowable over the above mentioned prior art made of record. Specifically prior art of record fail to teach or suggest when considered as a whole, the limitation reciting ***the binding performed using the XPATH statement to generate a new node in the informational display if the new node is specified by the XPATH statement and does not yet exist in the informational display***, as required by the independent claims. The instant independent claims when considered as a whole require extracting, using a filter, at least one user-changeable code portion from an existing informational display and place the at least one user-changeable code portion in a file, wherein at least one input field is bound, using an XPATH statement to the extracted code portion, and the binding performed using the XPATH statement allows generating a new node in the information display if the new node is specified by the XPATH statement and does not yet exist in the informational display. Clark being the closest prior art of record teaches creating a new informational display from an existing informational display and binding such code portion to input fields displayed on a user interface (see the rejection of claim 1 in the Office Action mailed 01/21/2009). However, Clark fails to teach both extracting using a filter at least

one user-changeable code portion from the existing informational display and also binding the at least one user-changeable code portion to at least one input field using an XPATH statement. Kothari teaches the general concept of separating user-changeable code portion from non-changeable code portion using a filter function but fails to teach use of XPATH statement for binding. Furthermore, alSafadi teaches XPATH for binding but fails to teach generating a new node in the informational display if the new node is specified by the XPATH statement and does not yet exist in the informational display. In other words, the prior art of record either alone or in combination fail to teach each and every limitations of the independent claims and additionally lack proper motivation to combine their respective teachings in the manner disclosed in the independent claims in order to arrive at the disclosed inventions recited in the independent claims. Therefore, the Examiner considers the independent claims 1, 14-15, and 18 to be allowable in view of the cited prior arts. Dependent claims 4-13, 16-17, and 19-20 further add limitations to the allowable subject matter of the respective independent claims. Therefore, all the pending claims 1 and 4-20 are considered allowable over the prior arts of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to RASHEDUL HASSAN whose telephone number is (571)272-9481. The examiner can normally be reached on M-F 7:30AM - 4PM EST.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Weilun Lo can be reached on 571-272-4847. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
